Education

Bachelor of Technology in Electrical Engineering, (Power and Automation) **2015–2019**
Indian Institute of Technology, Delhi, Grade: 8.27/10, Advised by: Prof. Prathosh AP

Publications and Pre-prints

3. *Shreyas S*, **Harsh Maheshwari***, Avijit Saha*, Samik Datta*, Shashank Jain, Disha Makhija, Anuj Nagpal, Sneha Shukla, Suyash S*, "Audience Creation for Consumables - Simple and Scalable Precision Merchandising for a Growing Marketplace", Under Review at ICDE 2021 [preprint: arXiv:2011.08575]

1. *Nayana Bannur, **Harsh Maheshwari**, Sansiddh Jain, Shreyas Shetty, Srujana Merugu, Alpan Raval*, "Adaptive COVID-19 Forecasting via Bayesian Optimization", in CoDS-COMAD 2021 [doi.org/10.1101/2020.10.19.20215293]

*Equal Contribution

Work Experience

Data Scientist - Flipkart Internet Private Limited **July, 2019 – Present**
Largest E-Commerce platform in India with over 200M users *Bengaluru, India*

- **Complete The Look** (Prof. Niloy Ganguly - IIT KGP, Dr. Arnab Bhattacharya - Flipkart):
  - Problem: Generating **fashion-compatible** and **diverse** outfits for a parent product for Indian users and their preferences.
  - Fashion preferences vary with **regions and demographics**. Due to lack of large scale compatibility datasets for all regions there is a need to device a better way to learn fashion-compatibility for different regions. We propose to cast this problem as identifying and **incorporating diversity** (e.g color diversity) with compatibility within an outfit.
  - We also realise that for an e-commerce platform with **various user preferences**, diversity across different outfits for the parent product is important. We incorporate this diversity into **beam search** using **determinantal point process**. (First version to launch soon on the platform)

- **Audience Creation for Consumables** (Samik Datta - Flipkart):
  - *Problem:* Creating an audience set for a store for precision merchandising on Flipkart Grocery home page.
  - We used a novel kernel to capture periodicity in purchase of grocery items (e.g. sugar) to predict purchase probability.
  - Designed and performed large scale experiments on **temporal point process** based precision merchandising algorithm for Flipkart Grocery. Paper under review at **ICDE'21**

- **Candidate Generation and Ranking** (Samik Datta, Dr. Adiya Rachakonda - Flipkart):
  - Customized **Bayesian Personalised Ranking based Matrix Factorisation** framework for Flipkart homepage recommendation (Improvement in clicks by **2 bps** on Flipkart homepage, currently in larger A/B testing phase) and designed multiple **Lamda MART** & LR based rankers for Flipkart home and product page.

COVID-19 Data Science Consortium **March, 2020 – Present**
A consortium of technologists working as volunteers in collaboration with Wadhwani AI to support public authorities in managing the COVID-19 pandemic by building and deploying technology solutions

- **Forecasting** (Dr. Srujana Merugu - Google Research, Dr. Alpan Raval- Wadhwani AI, Dr. Mohit Kumar- Udaan.com):
  - *Problem:* Given the past case counts of an isolated region, forecast the disease spread dynamics for the next k days.
  - Developed a Machine Learning framework for infectious disease forecasting based on **SEIR epidemiological model variants** with parameters estimated via **Bayesian optimization**. The fitted parameters give less than 10% MAPE error on the forecasts for COVID-19 case counts in Indian districts.
  - *Impact:* The system is being used for COVID-19 medical preparedness in war rooms of heavily impacted Indian cities.

- **Controlling an Epidemic** (Dr. Srujana Merugu - Google Research, Wadhwani AI):
  - *Problem Statement:* Given the medical capacity of an isolated region, create a transmission policy schedule to adaptively control the number of infections in an epidemic.
  - *Work Description:* Proposed an analytic control framework based on mapping the SIR model to the well studied **Lotka-Volterra** system and **control-Lyapunov** theory. The framework permits design of policies for adaptive control of transmission rate using non-pharmaceutical interventions that limits the overall disease burden.

TA, Machine Intelligence and Learning, IIT Delhi **July, 2018 – Dec, 2018**
Prof. Prathosh AP *Delhi, India*
- Assisted the professor in designing the course & assignments and grading them for a class of 150 students

Internships

Videoken, Bengaluru (Dr. Meghshyam Prasad) **May, 2018 – July 2018**
Computer Vision, Deep Learning
- Constructed a classifier which used patches of images, inspired by **patchGAN's discriminator**, to classify slides from software demo frames in a video by using **spatial pyramidal pooling** to deal with images of different sizes.
- Built an OpenCV based semi-automated image segmentation tool using **Django Framework** to reduce human efforts for annotating images by employing object tracking. Used to create annotated dataset quickly.
- Achieved high **dice coefficient** by training a U-net for segmenting projected slides out of presentation recordings

Projects

BoardSnapped (Prof. Prathosh AP, IIT Delhi) **Dec, 2017 – July, 2018**
- Formulated educational video summarization problem as a keyframe detection problem
- Extracted hand-crafted features from Images to perform unsupervised binary clustering using **GMMs**
- Divided the problem into two sub-tasks and solved them using **CNNs** and **bi-directional convolutional LSTM** models
- Achieved classification accuracy of **99.3%** and keyframe detection acc. of **97.38%** with precision & recall of **74%** & **77%**. Received highest grade by the panel.

Skin Segmentation from NIR Images, (Prof. Prathosh AP, IIT Delhi) **Apr, 2018 – Dec, 2018**
- To generate skin segmentation dataset for Near Infrared Images trained a **pix2pix** like **conditional GAN** to convert RGB images to NIR images.
- Trained **ResNet38** and **PSPnet** to segment human skiin pixels froom NIR Images to achieve high dice coefficient.

Advanced Machine Learning [Course], (Prof. Prathosh AP, IIT Delhi) **Jan, 2018 – May, 2018**
- **Face Detection and Recognition**: Used **FaceNet** model to achieve an accuracy of **98%**
- **Deep Learning Visualisation** - Visualized representations learned by DNNs through **Saliency maps, Occlusion experiments** & **Inverted Image Representations** and performed **Neural Style Transfer**
- **Speech segmentation**: Detected word boundaries in recorded speech using **bi-directional LSTM** on **TIMIT** database
- **Deep Learning framework**: Built a python based framework without using any deep learning library for creating neural networks and trained MNIST digit classifier

Scholastic Achievements

2015: **JEE Advanced:** Achieved AIR of 834 amongst 1.5 million students

March, 2019: **Finalist in Flipkart GRiD** Among 11 finalist teams in 4-stage National level AI/ML Challenge

June, 2018: **Huawei Seeds for the Future:** Among **4 students** from India selected for a 2-week training program in **China**, studied Chinese Language and Culture in BLCU, Beijing and picked up hands-on experience of **5G**, **IoT** and **Cloud Computing** in Huawei Headquarters, Shenzhen

2015: **NSEP top 1%:** Certified for being in **top 1%** out of 37837 in National Standard Examination in Physics (NSEP) organised by Indian Association of Physics Teachers (IAPT)

2014: **K.V.P.Y.:** Secured **AIR 59** in prestigious fellowship by IISc after national level exam and interview

Technical Skills and Relevant Courses

Relevant Courses: Advanced Machine Learning, Introduction to Machine Learning, Computational Learning Theory, Probability, Information Theory, Data Structures and Algorithms, Linear Algebra, Information bottleneck Theory of Deep Learning, Digital Image Processing

Languages & Frameworks: Python, Java, C++, C; PyTorch, TensorFlow, MATLAB; Keras, Scikit-learn; Hive, SQL

Position of Responsibilities

Secretary, NSS IIT Delhi **Apr, 2017 – Jan, 2018**

NSS, IIT Delhi is aimed at motivating students to participate in nation building and social work

- Co-led a team of 4 executives in Animal Care project to conceptualize and organize various sensitizing events in IIT and field trips to animal shelters in **collaboration with an NGO**
- Co-organised NSS orientation for 800+ freshers with a team of 30+ members to introduce NSS

Executive, NSS IIT Delhi **May, 2016 – May, 2017**

- Co-organized **free medical camps** for residents in Munirka Slum and **spread awareness** about common diseases and prevention methods in **collaboration with an NGO**
- Co-designed an ALP internship to **study the behavior of the Indian Society** and help reduce electricity wastage in households. Conducted by **100+ volunteers in 50+ cities** spread all over India

Mentor, Student Mentorship Program, IIT Delhi **Apr, 2017 – Apr, 2018**

- Guided 4 first year students to ensure smooth transition into IIT Delhi
